

MECO[®] TT SEALS TORQUE TUBE

An Employee Owned Company

MECO HC SEAL ADJUSTING KIT

MECO offers a torque adjusting kit for HC model seals. A precision Wera adjustable torque screwdriver offers accurate and repeatable adjustment of the HC seal's clamp. The Torque Tube kit includes the needed 7mm nutsetter for engaging the clamp head, as well as 6" and 10" bit extensions to facilitate access to the clamps in all sizes of HC seals, with instructions, packaged in a convenient plastic tube. The tools are also available individually.

INSIDE THE TT:

Wera 7440 adjustable torque screwdriver, 0.3 – 1.2Nmm

Wera 7mm x 65mm nutsetter

6" hex extension

10" hex extension

Tubular Case

REFER TO THE SEAL INSTALLATION INSTRUCTIONS, INCLUDED WITH YOUR HC SEAL AND IN THE TORQUE TUBE, FOR PROPER USE.
